VESSELS & ACCESSORIES

2.5 and 4 Inch Fiberglass Pressure Vessels

1000 PSI

Work pressure

Features

- Made with high quality FRP with an advanced winding process.
- The filament wound FRP shell is composed of continuous fiber glass impregnated with heated epoxy resin system.
- Designed for continuous, long-term use as housings for reverse osmosis.
- Allowable water PH range is 3-10 under normal operation conditions and 2-12 when vessel is periodically cleaned.
- Maximum operation pressure 300 PSI (21kg/cm²).

Includes

- Stainless Steel end plugs
- Stainless Steel retaining device
- O-rings

Model No.	No. of membranes	Membrane Size	L (Inches)	Port size
PV-FRP-2540-1000	1	25x40	43.00	1/4"-1/4"
PV-FRP-4040-1000	1	40x40	46.00	1/2"-1/2"
